**House Committee on Environmental Regulation re HB 830
MARCH 16, 2011**

The League of Women Voters of Texas (LWV-TX) STRONGLY SUPPORTS HB 830 by Representative Harold Dutton requiring the TCEQ to consider the cumulative effects on the public's health and physical property of expected air contaminant emissions from a proposed facility and other facilities located less than three miles from the facility or proposed facility.

There is no question that emissions react with other emissions, and these reactions should be taken into consideration in the permitting process.

LWV-TX urges the committee to pass this bill on to the House with a recommendation for a favorable vote.
